Subject: Estimate Please

You did an excellent job on my wife's 2000 Camery, timing belt and water pump and a few other things as well. She totaled it shortly after and there was nothing left but the driver's seat. I bought her and old Volvo tank for her health. Mechanically it looks pretty good but I think it needs a timing belt and water pump. It's a 1995 Volvo 850 Turbo Wagon 2.3L automatic. The speedometer broke at 94,002 but I'm estimating 143,000 miles and five years since the last belt change.

Thanks,

From the pit of the "Peach State"
